ASTEX PRISTINE® PERFORMANCE FABRIC
BARRIERS - YOU CHOOSE!

Astex "ACTIVE" GUARDS actively control house dust mites which can cause

asthma • eczema • rhinitis

sneezing • watery eyes • runny nose

poor sleep • irritability • retarded growth in children

Facts

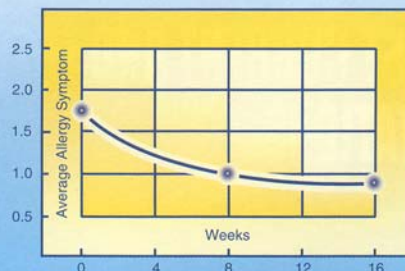

- House dust mite allergens have been scientifically proven to be the **major indoor cause** of allergic attacks
- **1 in 5 people** suffer from allergies caused by house dust mites
- **85%** of asthma sufferers are **allergic** to house dust mites
- **40%** of children experience rhinitis by the age of 6
- **152 children** are admitted to hospital every day as a result of asthma

- Up to **20%** of the weight of a used pillow is attributed to dust mites
- The average double mattress is home to up to **two million** dust mites

The Astex "Active" Guard Solution

- **Kills house dust mites** and keeps bedding clear for two years
- **Soft and comfortable:** no sweating
- **Safe and easy** to use
- **77%** of dust mite allergic patients have recorded an improvement in their symptoms

- The proportion of patients reporting 'clear' symptoms increased from **4% to 34%** (during patient assessment trials)

NOTE: ASTEX "ACTIVE GUARD" IS NOT A BARRIER SHEET. IT ACTIVELY CONTROLS HOUSE DUST MITES!

Testimonials

"I have tried other products that claim to help, but nothing did the trick for Richard until we used Astex. Since using the Astex covers, Richard has been able to cut down his inhalers, and importantly he feels a lot better during the day. I am so impressed with Astex - I want to tell everyone! It really has changed our lives."

- Barbara Clark, Launceston, Cornwall

"Since using the Astex covers, alongside my normal inhalers, I feel that my asthma is now under control. By using the Astex covers over a two year period, I will undoubtedly see a reduction in my prescription costs. Our family has certainly seen a change for the better since using Astex on our beds."

- Reverend Kevin Jones, Manchester

Astex "Active" Guards are simple and easy to use

1. Fit Astex "Active" Guards under your normal bedding
2. After eight weeks remove the Astex "Active" Guards, vacuum the mattress and bedding (we recommend using new filters and bag in your vacuum)
3. Refit Astex "Active" Guards and leave for two years to prevent house dust mites returning

No further cleaning of the covers is required.

NB: Hot washing and drying impairs effectiveness. In the event of an accident, sponge-clean the covers with lukewarm water.

MONEY BACK GUARANTEE

ASTEX "ACTIVE" GUARDS OR NEW ASTEX "PRISTINE®" Guards - (see overleaf for details)

Brand New - The Other Option

Astex's "Pristine"® Guards

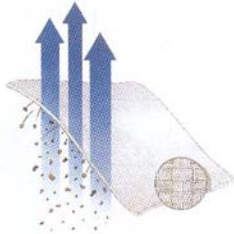

The Toughest Barrier with the Softest Touch

- **What are Astex's "Pristine"® Guards?**

The dictionary definition of "Pristine" implies clean, pure and uncontaminated. In reality that's exactly how Astex "Pristine" guards keep your pillow, mattress and duvets ...clean and uncontaminated from dust, dust mites and their allergens.

- **How do Astex's "Pristine" Guards work?**

Astex's "Pristine" Guards are made from a new fabric technology - 'Pristine'®, brought in especially from the USA. Pristine fabrics are made of very, very tightly woven yarns - woven so closely that dust mites and allergens cannot pass through. However their secret is that unlike other barrier fabrics, air and moisture vapour easily pass through the fabric.

- **How long are Astex's "Pristine"® Guards effective?**

Pristine fabrics are very durable. They do not lint or pill. With proper care, **Astex's "Pristine" Guards** will last you for years and years. For assurance, **Astex's "Pristine" Guards** come with a 5 Year Guarantee, and of course the Astex money back guarantee.

- **Astex's "Pristine" Guards** carry the CE Medical Devices Mark.

Brand New - The Other Option

Astex's "Pristine"® Guards

The Toughest Barrier with the Softest Touch

- **Has Pristine® been tested to show that it works?**

The manufacturers of Pristine® have tested the fabric in the Department of Asthma, Allergy & Immunology at two US leading Colleges of Medicine. Both found that Pristine is an effective barrier to dust, dust mite and the allergens that can cause allergic symptoms among sufferers of asthma and rhinitis. **Astex's "Pristine" Guards** are a proven, effective barrier to dust mites and other allergens.

- **I can't wash Astex "Active" Guards, because they contain an active ingredient. Should I wash Astex's "Pristine" Guards?**

ABSOLUTELY YES - All barriers must be washed frequently. Unfortunately washing causes the pore size in Non-woven fabric to enlarge after only a few washes, causing the covers to become less effective. In contrast, regular washing every 4-6 weeks make the pore size in **Astex's "Pristine" Guards** actually smaller making these barriers even more effective. **Astex's "Pristine" Guards** can be washed at temperatures up to 160°F ensuring that all dust mites are killed and their allergens removed.

Astex's "Pristine" Guards simply outperform other barriers

*Elimination of the house dust mite
may help prevent young children
from becoming allergic.*

NOW YOU CAN...

- TREAT**
- PREVENT**
- PROTECT**

**AGAINST CURRENT AND FUTURE
INFESTATIONS**
